

ISROEXPO

ISRO (Indian Space Research Organisation) conducts outreach programs in colleges to promote science and space exploration among students. These programs may include

- **Exhibitions:** ISRO sets up exhibitions at colleges to showcase their work. These exhibitions typically include models of rockets, satellites, and other spacecraft, as well as interactive displays that allow students to learn about different aspects of space exploration.
- **Talks:** ISRO scientists and engineers give talks at colleges about their work. These talks can help students to learn about the latest developments in space exploration and the challenges that scientists and engineers face.
- **ISRO Space Science Exhibition(SPACE ON WHEELS):** This event is a mobile exhibition that travels to colleges across India. The exhibition features models of rockets and satellites, as well as interactive displays that allow students to learn about different aspects of space exploration.
