NEED FOR SPEED

Need for Speed is a technical event for building a line-follower robot that will follow the specified path. The competition will be conducted as a team. This takes place in 3 rounds. The contestant will have to get the code right, calibrate the IR sensor, and do wiring using a jumper wire.

Round 1: The time for assembling the robot will be noted and should work within the path given for the first stage (Based on points).

Round 2: The path for stage 2 will be different than the first. It will be checked whether the bot goes through the given path without going out of the path.

Round 3: The time of completing the path will be noted in this stage.

Rules & Regulation:

- The team should consist of a minimum of 2 members and a maximum of 3 members.
- Each round will complete the team as per the respective time.
- Smartphones, smartwatches, or any other gadgets are not allowed.
- Any cheating will lead to disqualification.
- The Number of rounds may vary according to the registration and number of teams.
